

DRINKING WATER WARNING

Tooley Water District water may have high levels of nitrate for a couple of days

**DO NOT GIVE THE WATER TO INFANTS UNDER 6 MONTHS OLD
OR USE IT TO MAKE INFANT FORMULA**

Tooley Water District must introduce a new water source that had results of a water sample collected 10/16/20 showing nitrate levels of 18.6 milligrams per liter which is over the maximum contaminant level (MCL) of 10 milligrams per liter. Nitrate in drinking water is a serious health concern for infants less than six months old.

This is a temporary solution as we are working with technical challenges with our other well. It is expected to be able to revert back our alternate water source in a couple of days.

What should I do? What does this mean?

DO NOT GIVE THE WATER TO INFANTS. **Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue baby syndrome.** Blue baby syndrome is indicated by blueness of the skin. Symptoms in infants can develop rapidly, with health deteriorating over a period of days. If symptoms occur, seek medical attention immediately.

Water, juice, and formula for children under six months of age should not be prepared with tap water. Bottled water or other water low in nitrates should be used for infants until further notice.

DO NOT BOIL THE WATER. Boiling, freezing, filtering, or letting water stand does not reduce the nitrate level. Excessive boiling can make the nitrates more concentrated, because nitrates remain behind when the water evaporates.

Adults and children older than six months can drink the tap water (nitrate is a concern for infants because they can't process nitrates in the same way adults can). However, if you are pregnant or have specific health concerns, you may wish to consult your doctor.

What is being done?

For more information, please contact Hiland Water at 503-554-8333.

Additionally, Tooley Water District's website www.tooleywwater.org will always be updated with the latest status with regards to Tooley Water District's water.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
